A METHOD OF FABRICATING MANUFACTURED AGGREGATES

5 The invention relates to a method of fabricating
manufactured aggregates (10), characterized in that the
following steps are performed:

 • supplying a first material (12) comprising
particles;

10 • supplying elements (16, 18, 20, 22) for forming a
second material (14);

 • mixing a predetermined quantity (Q12) of said first
material (12) with a predetermined quantity (Q16, Q18,
Q20, Q22) of each of said elements (16, 18, 20, 22) of
15 said second material (14), so as to obtain a mortar (M12-
14) made up of inclusions (12) corresponding to the first
material and a matrix (14) corresponding to the second
material (14);

 • subjecting a first cure (T1) to the mortar (M12-14)
20 for a predetermined first cure duration (t1); and

 • crushing (C) said mortar (M12-14) to obtain
manufactured aggregates (10).
